

Duplex Strainers

Flow Rate Vs. Pressure Drop (Clean Screen)

These curves are for clean baskets, without mesh liners - and with WATER flowing through the strainer. For mesh-lined baskets and/or other fluids, you must first compute a correction factor.

Model D125 and D150 Duplex - 3/4" Through 4"

Model DF125 and DF150 Duplex - 5" Through 8"

Notes:

Pressure drop curves are based on water flow with standard screens. For other fluids and/or screen openings, the figure shall be multiplied by the following correction factors.

These charts are for theoretical calculations **ONLY**. Please contact our office with your exact specifications and you will be provided with factory calculations.
